

Linedata Transfer Agent Portal

Helping you serve your clients better

As a Transfer Agent, you play a vital role in today's investment market. In an increasingly impersonal world, you represent the critical link between asset management firms, and investors and their representatives. Customer service is your focus, even as costs rise, margins shrink, and investors expect instant access to information.

At Linedata we understand your role's importance, and the pressures you face. We've created our new Transfer Agent Portal with you and your clients in mind, whether they are fund managers, brokers or private investors.

The TA Portal's 'self-service' approach lets investors check balances and statements, and update personal details, saving phone calls and paperwork. Users can place trades and receive instant order validation – or instructions if the order doesn't match the fund's criteria – providing peace of mind and avoiding failed trades. It integrates with your Linedata Transfer Agency platform using APIs so all parties always have access to up-to-date, accurate information.

Whether you are already one of our Transfer Agency clients or are looking for a new partner, our TA Portal can save time and money, enhance your customer satisfaction, and support automation and digital transformation.

The Linedata TA Portal – helping your clients help themselves

The TA Portal maximises self-service. You can easily tailor it to each type of end-user and brand it according to your preferences.

Fund Managers

Fund managers demand up-to-date information in relation to all aspects of shareholder interaction, including NAV and cash flow data at fund, sub-fund and class levels in order to expedite quick, efficient decision-making.

Our TA portal can be configured and branded to ensure that the differing requirements of each fund manager can be met through a professional, customized user experience.

Brokers / Distributors

Brokers must balance expectations of a broad range of clients, from professional investors to private individuals. Our TA Portal lets them view and download client information, access reporting, and use the self-administration function to update client details.

Brokers can create account logins and grant Portal access to each investor. The entire process is managed with minimal effort, creating a personalized experience.

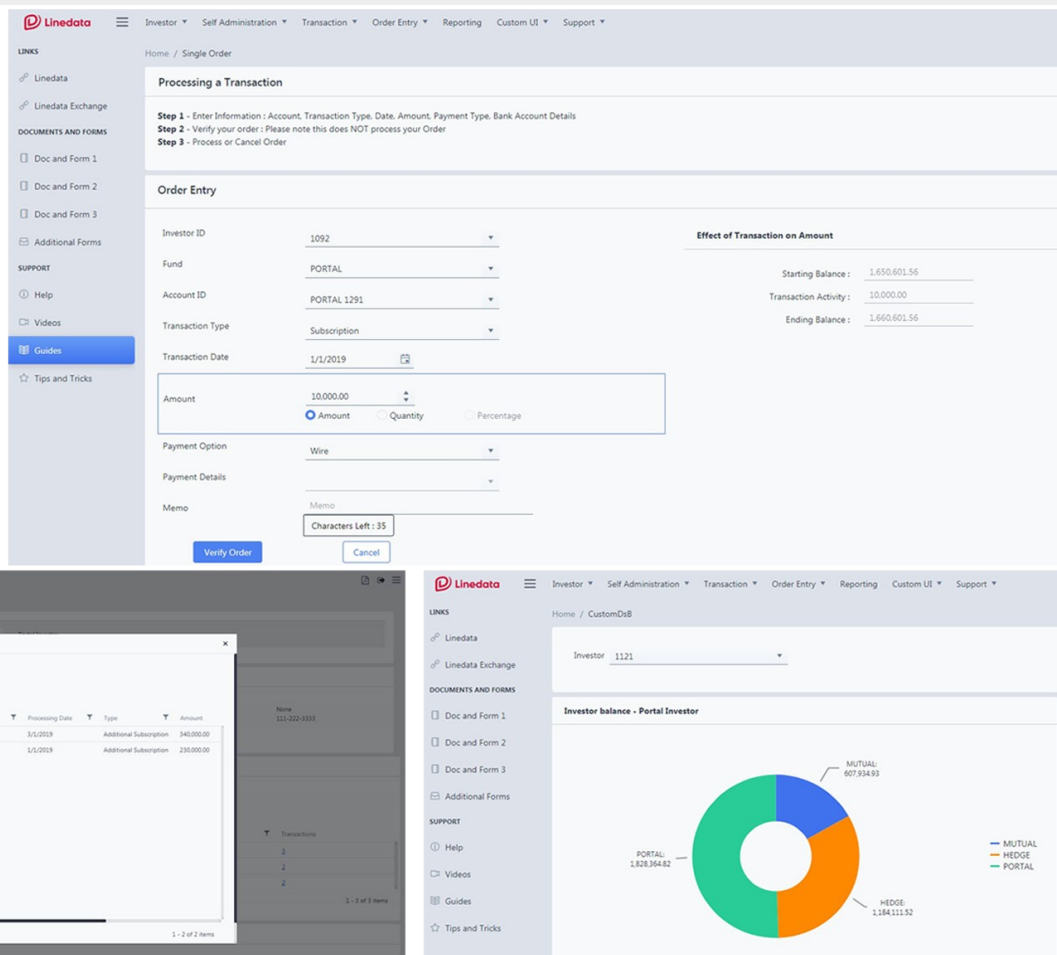

Investors

Investors are more hands-on than ever, with expectations set by the ease of online banking and similar services. Our TA Portal lets investors access information and make trades anytime, using its intuitive user interface.

Investor reporting is delivered via the TA Portal and tailored specifically for individual investors. They enjoy peace of mind, and you avoid unnecessary manual intervention.

The TA Portal gives investors 'self-service' access to check balances, make trades, download statements and update personal details.

Key benefits and features
