

## Linedata Cybersecurity Services

World-class protection for Asset Managers, Hedge Funds and Private Equity

Global cybercrime costs  
are expected to hit

**\$6T**

by 2021, doubling since 2015.

*Cybersecurity Ventures*

Cyber-attacks are

**300X**

more likely to target financial  
institutions than other firms.

*Forbes*

Business Email Compromise

(BEC) scams have cost over

**\$12B**

since 2013.

*Federal Bureau of Investigation (FBI)*

Is your firm protected by the right cybersecurity systems, intelligence, controls and training? Don't find out the hard way.

Security breaches pose greater challenges to asset managers than ever before. Information security vulnerabilities can jeopardize your reputation, threaten your profitability and draw fines and penalties from regulators. Technology to mitigate the risks – and the expertise to deploy it – are highly complex and evolving fast.

At Linedata, we can help. Our Linedata Cybersecurity Services offering protects your business with actionable intelligence from highly skilled, industry-certified experts. By examining all security angles, we provide an ongoing view of risk, analytics and active intelligence reporting.

And, our two decades as a leading asset management solution provider mean we truly understand your operations and security challenges – and know how to protect your assets.

### Strategic protection thanks to out-of-the-box thinking

With Linedata Cybersecurity Services, we employ a holistic approach to address your firm's specific security needs.

We assess your firm and vendor risk, including risk from third-party and fourth-party vendors and external factors, using proven, intelligence-community techniques. Automated scanning and machine learning help you identify and address current security vulnerabilities – and mitigate future risks.

Security isn't a one-time check list.  
Gain peace of mind with an active-  
intelligence program from a trusted  
partner.

Linedata takes your operational risk as seriously as you do. Unlike tick-box DDQ exercises, our protection evolves with the threat landscape.

Comprehensive compliance policies, advanced technologies and robust controls protect you against a full range of threats including phishing, zero-day malware and network-based attacks.

We let you focus on investment performance, knowing your security is best in class.

## Linedata Cybersecurity Services: giving you the keys to future-proof your data security.

### Security Risk Assessment

We review, identify and prioritize "at risk" areas. Ongoing due diligence identifies security and risk exposures from your portfolio companies.

### Layered Defense

Full stack and layered defense incorporates EDR (Endpoint Detection and Response) for continuous protection and threat detection and isolation.

### Threat Intelligence

Ongoing monitoring, alerting and actioning on new and emerging threats. Plus phishing and social engineering testing.

### Vulnerability and Penetration Testing

Our threat experts identify both technical and non-technical areas of possible exploitation in your environment.

### Policy and Controls Review; Training

We develop and keep current your regulatory compliance policies, procedures and controls. Bespoke training prepares staff to prevent and manage cyber events.

### 360-degree Risk Analysis

"Beyond DDQ" monitoring of real-time vendor risk. Machine learning technology identifies evolving threats and provides customized alerts.

**Why Linedata Cybersecurity Services?** We offer the best of both worlds: advanced cybersecurity expertise, tools and technology, backed up by deep asset management business and operational know-how.

- Exclusive focus on broad cross-section of global asset managers
- 10-year track record in cybersecurity and intelligence analysis
- Highly skilled intelligence experts and IT security engineers
- Leading-edge technology: EDR, machine learning and more
- IT security certifications: PCIP, CHP, CCNA, CGEIT, CISM, GCFA, GCIH, CEH, CHFI, and ISO/IEC 27001 Lead Auditor certification
