Linedata

Linedata Protect Cybersecurity Solution
Safeguard your business with our EDR / MDRR offering

The events of 2020, centered around the COVID-19 global pandemic, have produced a permanent shift to a hybrid working environment. This shift has also given cybercriminals numerous golden opportunities to attack both your assets and your data, as users have exchanged the relative security of office networks for external Wi-Fi and remote working.

How great is the danger? Cyberattacks increased by 700% in the 12 months following the mass adoption of remote working. An average of 560,000 instances of new malware are created and detected each day. With 70% of successful breaches originating at the endpoint, it's time to reassess your protection foundation and take steps to harden the vanishing perimeter of your corporate network.

At Linedata, we're helping alternative and traditional asset managers bolster their security with robust consumption-based solutions that address this new reality. **Linedata Protect** and **Linedata Protect Premium** package cutting-edge technology and human expertise to deliver fully managed security operations.

Protect your organization's assets and reputation, regardless of where you do business.

Linedata Protect

Endpoint Detection and Response (EDR): Advanced endpoint protection.

1. Cylance behavior-based next-gen antivirus and EDR

2. 24/7/365 Security Operations Center (SOC)

3. Enhanced antivirus and threat landscape reporting through intuitive UI

4. 24/7/365 Service Desk Remediation Team

5. Industry-leading Fusion Platform

6. Quarterly meetings with your security team

Linedata Protect Premium

Managed Detection, Response and Remediation (MDRR): Threat management as a managed service.

ALL Linedata Protect features (1-6).

PLUS:

7. Round-the-clock threat remediation (MDRR)

8. Security Incident Event Management (SIEM) utilizing IBM QRadar

Benefits at a glance

- **Best-in-breed End-Point Security (EDR):** ONE relationship gets you best-in-class service from cybersecurity professionals AND investment management industry expertise

- **Transparent pricing and cost certainty:** consumption-based model with no minimums, scaling up and down as your needs evolve

- **Next-generation antivirus:** threat hunting using behavior-based AI/ML (heuristics)

- **360-Degree visibility:** comprehensive protection of your data, assets, and reputation

- **Rapid response and remediation:** playbook-driven responses, pre-authorized containment of compromised endpoints, patching, and remediation

- **Business, regulatory, and reputational risk mitigation:** demonstrable protection based on industry best practice and regulatory guidelines with full audit trail reporting

- **Robust endpoint monitoring:** round-the-clock surveillance and immediate response

- **Proactive endpoint protection:** threat hunting identifies hazards before they can be exploited

- **All-in-one-solution:** onboarding, policy definition, solution configuration, lifecycle management, and full remediation

- **Broad device coverage:** laptop and mobile endpoints (Mac OS / Windows OS)

- **Advanced server protection:** VDI / Windows / Linux® (supported only for NGAV)

- **Public cloud integration:** AWS, Azure, Office 365, and G-Suite
