

It's time to take another look at Linedata Application Hosting

Save money and time – and focus your talent on core business activities

The COVID-19 pandemic has forced firms and leadership to rethink their technology strategy. Overnight, we've had to manage remote access, redeploy staff, and rethink technology roadmaps.

As you plan your future, consider Linedata Application Hosting. For over 15 years we've helped firms like yours better manage costs and focus on core business. Our private cloud hosting solutions provide cost certainty, reduce overhead, and give you greater freedom to execute your IT strategy.

From daily maintenance of your Linedata fund accounting platform and related applications to version updates, integration, and testing, we'll keep your operations running smoothly.

Why Linedata

- We're global Asset Management and Fund Services technology experts. We know what it takes to make your operations as efficient and cost-effective as possible
- We're independent — our only agenda is to serve your needs better
- We understand technology and business models, solving digital challenges pragmatically and effectively
- Our highly experienced technologists and experts work with you as trusted partners. We're there when you need us

Is hosting right for you? 7 questions to ask yourself.

1. Do we want to reduce our software contracts and related vendor overhead?
2. Are we paying for extra hardware capacity that we aren't using?
3. Are version upgrades straining our teams' bandwidth?
4. Do we need to maintain specific IT expertise for our Linedata platform and related applications?
5. Is talent retention a challenge for specific technologies?
6. Can it a challenge to scale our application deployment as our needs change?
7. Are we rethinking our physical premises in light of increased remote working?

If you answered yes to any of these questions, you should consider Linedata Application Hosting.

We'll manage your fund services software so you can focus on running your business.

Control costs

- Cost certainty makes budgeting easier (OpEx vs CapEx)
- Lower total cost of ownership: no hidden staffing costs or upgrades for you to manage
- No additional hardware or software to install or maintain

Manage resources

- Keep in-house staff focused on core business activities
- No need to train staff on multiple non-core technologies
- Version upgrades managed by Linedata

Mitigate risks

- No more out-of-date software or hardware
- Single point of contact for all Linedata-related technology
- Global disaster recovery and world-class cybersecurity

Choose the right solution for your business from our global offering
