Linedata launches AI-driven investment data management solution for private markets

- Linedata's Cognitive Investment Data Management Service offers a custom, AI-driven front office data management solution for asset managers and alternative funds
- New solution leverages AI, machine learning and natural language processing to deliver intelligent data extraction
- Solution reduces idea validation times by nearly 60% compared to analyst-driven research

Paris, Boston, New York, Charlotte, London, Hong Kong, May 12, 2022 - [Linedata](#) (Euronext Paris: LIN), a global provider of asset management and credit technology data and services, today announced the **launch of its Cognitive Investment Data Management Service**, a front office data management solution for asset managers and alternative funds that utilizes AI, machine learning (ML) and natural language processing (NLP).

With the rise of digital transformation and the explosion of data, asset managers and credit analysts are often strapped for time and facing an information overload. With this solution, **investment teams can act faster to spot alpha while gaining back time and productivity**. Intelligent data extraction cuts opportunity screening and idea validation times by nearly 60% compared to analyst-driven research.

This new solution provides asset managers and alternative funds with **readily usable and customizable information and insights, so they can quickly act when making investment decisions**. Linedata also enables the ability to add an on-demand virtual assistant, combining advanced technology with deep domain expertise and years of process knowledge.

"Having quick and seamless access to investment data is critical for responsible financial decision making in the private markets sector," said **Anup Kumar, Global Head of Linedata Global Services**. "Not only does Linedata provide clean, accurate and structured private and public coverage data to our clients, but we can also help them better understand its insights to enable them to act sooner to capitalize on opportunities to generate alpha, ultimately boosting their operational efficiency."

With one solution that works across any desired capital structure, market and strategy, Linedata Cognitive Investment Data Management Service helps scale and strengthen the investment management process.
