

Linedata Cloud Services

Transformational public, private, and hybrid cloud solutions for Asset Managers

Cloud computing has the power to transform asset management. Fund managers that think 'public cloud first' can grow faster, respond nimbly to market changes, control costs, and optimize compliance and risk management.

If you're still waiting to move to public cloud, you may have concerns about the challenges of defining your cloud strategy, managing your migration, and converting your application integrations and related 'tech debt' while maintaining cybersecurity and ensuring compliance.

Fortunately, there's an answer: Linedata Cloud Services. Our expert team will guide you on each step of your journey, from defining your strategy to implementing the right architecture, delivering a smooth migration (including integration) and securely hosting your applications and data.

“

Linedata's ability to respond to each phase of our growth cycle with the right strategy, technology, and people has made them a trusted, highly valued partner.”

**COO, Global Macro Hedge Fund,
\$4.2B AUM**

Our teams are experts at designing, delivering, and managing public, private, and hybrid cloud operations for a broad range of asset management firms. We'll help you choose and implement the right strategic roadmap for your business requirements now and in the future.

The Linedata difference

At Linedata, we're big enough to roll out global solutions while remaining focused on your individual requirements. Regardless of your sector, size or location, we'll provide the best of both worlds: deep understanding of the asset management business, and the right expertise, tools, and relationships to make your move to the cloud smooth, transparent, and cost-effective.

Whatever your role, we've got your needs covered.

CTOs / IT Directors

We help you define your cloud strategy and roadmap and manage the things that you don't want to. With our assistance you will be able to provide maximum value to your COO.

COOs

We'll partner with you to provide a strategic IT roadmap, highly trained technology team, and cloud expertise so you can concentrate on core business.

CEOs

We help you free up operational, technical, and financial resources. Gain the flexibility to scale quickly and focus on profitability, knowing your IT, data, and cybersecurity are all covered.

Check all the right boxes with our fully featured cloud services.

Public cloud hosting and applications

We'll provision and provide discount licensing of major public cloud providers, including Azure, AWS, G-Cloud, IBM, and Office 365.

Optimization and cost management

We optimize your public cloud usage and manage your spend so you can measure ROI and don't pay more than you need to.

Full data integration

Get the data you need to the applications that need it. We offer full data integration for feeds from leading data providers.

Networking and connectivity

Continuous monitoring of your network infrastructure ensures maximum availability for business-critical applications.

Round-the-clock support

As your IT team, we proactively manage uptime and access and provide hands-on support when issues arise.

Compliance

Full compliance with environmental controls provided under SOC in accordance with SSAE No. 16 and ISAE 3402.

Cybersecurity

We protect your business and reputation with monitoring, alerting, and response to cyber and data security threats.

Professional Services

We design and deliver IT solutions to your requirements while ensuring that projects come in on time and on budget.

Application integration

Ensuring full functionality of business-critical applications is often forgotten during cloud migration planning. Our award-winning software development ensures full integration after migration.

Linedata Technology Services

Our Linedata Technology Services portfolio includes Cloud, Cybersecurity, and Managed Services that address the requirements of asset managers, hedge funds, and private equity. Focus on core business knowing your IT and cybersecurity are in good hands.
