## Linedata launches structured finance capability strengthening Linedata Ekip<sup>360</sup>

- This new offering is aimed at banks and credit institutions wishing to benefit from a high-performance and scalable software platform to enhance their operational efficiency.
- It covers the entire structured finance lifecycle, enabling complete digitization of processes, while providing an optimized user experience to increase productivity.

Paris, Casablanca, Lisbon, Mexico City, Seattle, Toronto, November 19, 2024 – [Linedata](#) (Euronext Paris: LIN), a global provider of asset management and credit technology, data, and services, announces the launch of its structured finance offering. Integrated with Linedata Ekip<sup>360</sup>, it simplifies the management of complex structured finance structures for investment banks and credit institutions. The entire value chain is covered in a unified solution. Its broad scope connects all participants via an open syndication process, enables the management of contracts and accounting and even the monitoring of waivers and covenants.

This powerful and scalable software platform increases operational efficiency and accelerates the optimization of financing processes. Thanks to its multi-all solution capability, it enables effective management of all parties involved in the contract (borrowers, agent, participants, etc.), and integrates management dashboards providing summary or detailed information in real time. All these features aim to meet the current challenges of the sector such as the digitalization of processes, artificial intelligence and ever-increasing operational efficiency.

"With this new offering, our customers benefit from an integrated and modern solution for the management of their structured finance. The platform provides a complete view of the portfolio and allows users to manage the entire structured finance lifecycle. Our goal is to simplify our customers' day-to-day operations, while enabling them to increase efficiency and develop their business, particularly through white-label deployment. All features are integrated into the Linedata Ekip<sup>360</sup> platform, whose unique configuration and customization capabilities help meet industry expectations," said **Bertrand Cocagne, Chief Technology and Innovation Officer at Linedata Lending & Leasing**.

With its AI-powered workflows, modern and customizable interface, simplified configuration and extensive reporting capabilities, Linedata Ekip<sup>360</sup> is positioned as a unique high-performance solution:

- **Augmented workflow:** Linedata has integrated artificial intelligence to accelerate the power of workflow. The "Digital Assistant" offers predictive actions based on the choices of other users for the same type of file, thus avoiding errors and speeding up processes.
- **Ergonomics and customization:** The application offers a contextual search bar, allowing considerable productivity gains for users. In addition, the interface can be fully and easily customized, increasing the accessibility of functions that are essential to each customer's business.
- **Real-time reporting:** Business Intelligence features provide access to a wide range of customizable charts and graphs, enabling customers to monitor their business, portfolio, or even identify customers with large amounts under management.
- **Integration:** The solution's full API stack enables easy integration with the customer's ecosystem, including CRM solutions, credit repositories, and due diligence tool providers. These integrations offer a simple, direct and reliable journey to users.

Structured finance is now available to all business lines covered by Linedata Ekip<sup>360</sup>, offering a complete and flexible response to manage any type of financial product: structured finance, corporate credit, leasing, equipment lending, consumer credit, car financing, long-term leasing, inventory financing, including both simple and complex loans, as well as the possibility of extending into other banking activities.
