

Linedata

Linedata Mosaic

**One Workspace.
Multiple Systems.
Zero Disruption.**

Front-office teams operate across trading platforms, market data providers, analytics tools, and portfolio systems. The result is fragmented workflows and constant screen switching.

Linedata Mosaic changes that.

It is the unified workspace that connects the tools, data, and workflows investment professionals rely on every day.

Portfolio managers and traders work in a single environment where portfolio context, liquidity insights, analytics, & trading workflows come together.

Built on the Linedata platform, Mosaic connects existing systems through open interoperability standards and modular tesserae, modernizing workflows without replacing your technology stack.

The result is a simpler, faster, and more connected investment workflow—where teams move seamlessly from insight to execution.

The Mosaic Difference

Fragmented Front Office

Multiple systems
Disconnected workflows
Slower decisions

Linedata Mosaic

One workspace
Connected workflows
Faster execution

Linedata Mosaic

The Workspace for the Interoperability Era

Why Linedata Mosaic?

Unify fragmented front-office workflows

Bring trading, market data, analytics, and portfolio context together in a single environment.

Work across multiple systems without disruption

Connect existing OMS, tools, and data providers—eliminating constant screen switching.

Expand capabilities with modular Tesserae

Add Linedata or third-party capabilities as needed and evolve the workspace over time.

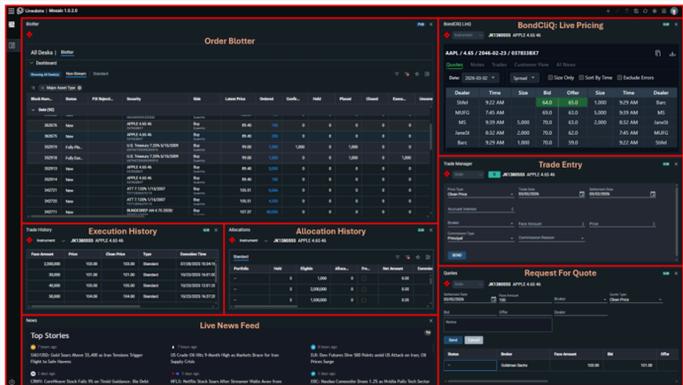

Access partner data and liquidity directly in context

Integrate fintech providers and market intelligence directly into the workflow.

Modernize without replacing your stack

Mosaic sits above existing systems, delivering a unified experience without platform replacement.
